EDUCATION

University of South Florida

Tampa, FL

Bachelor of Science in Computer Science

Aug. 2021 – May 2025

- **GPA:** 3.6 / 4.0
- **Advanced Coursework:** Data Storage and Analysis with Hadoop, Automata Theory, Social Media Mining, User Experience Design, Database Design

EXPERIENCE

DefTechLink

Tampa, FL

Full-Stack Developer Lead

March 2025 – July 2026

- Spearheaded full-stack development of two production B2B SaaS platforms that aggregate and manage global defense contracting opportunities for technology companies.
- Engineered an AWS Lambda and EventBridge ingestion pipeline processing 1,000+ defense contract notices daily from global government sources, automatically scoring, tagging, and classifying opportunities.
- Engineered AI-powered features using OpenAI for intelligent opportunity matching, executive report generation, and automated content analysis.
- Integrated third-party services including Stripe, OpenAI, QuickBooks, AWS S3, and Mailchimp APIs to deliver subscription billing, AI workflows, cloud storage, payment reconciliation, and customer engagement features.
- Architected PostgreSQL databases on AWS RDS, designing scalable schemas, executing production-safe migrations, and maintaining data integrity across development and production environments.

U.S. Department of the Air Force

Warner Robins, GA

Software Engineer Intern (Secret Clearance)

June 2024 – July 2024

- Served as Backend Lead for a full-stack management platform that centralized project metrics and sprint tracking across 10+ engineering projects.
- Containerized PostgreSQL with Docker to support scalable deployment for 300+ engineers.
- Collaborated in Agile development using Jira and Figma, contributing to the successful delivery of three development sprints.
- Developed 10+ REST APIs using Flask, SQLAlchemy, and PostgreSQL to support core platform functionality.

PROJECTS

TaskNook | React, Tailwind, Flask, SQLAlchemy, SQLite, Alembic, PyInstaller

- Built a full-stack productivity application centered around a fully customizable workspace with dynamic weather, ambient audio, and time-of-day themes.
- Developed task management and focus tools including scheduling, recurring routines, task-ordering algorithms, a Pomodoro timer, and music integration with YouTube and Spotify.
- Designed an interactive isometric workspace featuring a hand-drawn SVG environment, a 93 item furniture catalog, drag-and-drop placement, depth sorting, and customizable floor plans.

TwitterFeel | Python, TensorFlow, Pandas, NumPy, Hugging Face

- Built a machine learning pipeline to analyze social media posts and detect patterns associated with depression, anxiety, and suicidal ideation.
- Trained LSTM models in TensorFlow on a 20,000-tweet Kaggle dataset after preprocessing, lemmatization, and feature engineering.
- Applied SMOTE and outlier filtering to achieve 0.82 accuracy, precision, recall, and F1 score.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, C, HTML/CSS, SQL

Frameworks & Libraries: React, Flask, SQLAlchemy, Node.js, MUI, Bootstrap

Backend & APIs: REST APIs, Auth0 (JWT/OAuth), OpenAI, Stripe, QuickBooks, Mailchimp

Cloud & Infrastructure: AWS (Lambda, EventBridge, RDS, S3, EC2, CloudWatch, IAM), Docker

Databases: PostgreSQL, MySQL, SQLite

Developer Tools: Git/GitHub, Linux, Jira, Figma, Notion
