EDUCATION

University of South Florida

Bachelor of Science in Computer Science

Tampa, FL

Aug. 2021 – May 2025

- **GPA:** 3.6
- **Relevant Coursework:** Database Design, Data Storage and Analysis with Hadoop, Automata Theory, Social Media Mining, User Experience Design, Secure Coding, Operating System

EXPERIENCE

DefTechLink

Full Stack Developer Lead

Tampa, Florida

March 2025 – Present

- Architected and implemented a data-ingestion pipeline with AWS Lambda and EventBridge, processing 1,000+ daily contract notices from multiple government sources.
- Developed and maintained backend services for contract opportunity extraction, integrating RESTful API calls to fetch, filter, and process contract data
- Designed, normalized, and optimized a PostgreSQL database schema, ensuring efficient indexing, relational integrity, and structured data storage
- Collaborated in Agile sprints, contributing to planning, standups, and iterative delivery cycles.

U.S. Department of the Air Force

Software Engineer Intern

Warner Robins, GA

June 2024 – July 2024

- Led backend development as the Backend Lead, spearheading efforts to develop a full-stack management application that centralized metrics and sprint tracking for over 10 ongoing projects.
- Containerized a PostgreSQL database with Docker for scalable data handling used by 300+ engineers.
- Applied AGILE project management practices using Jira and Figma for design concepts and sprint planning, leading to the successful completion of 3 sprints.
- Developed 10+ CRUD REST APIs using Flask and SQLAlchemy to store, retrieve, and modify data in PostgreSQL.

PROJECTS

Perfect Path | Python, Flask, HTML/CSS, JavaScript, PostgreSQL, AWS

- Developed a class scheduling web application for course planning and sharing schedules, utilizing 28 unique core and elective classes in the Computer Science program at USF.
- Implemented user authentication and authorization features, including password validation and admin privileges.
- Hosted the PostgreSQL database on cloud AWS for seamless access and modifications.

TwitterFeel | Python, Tensorflow, Pandas, Numpy, Hugging Face

- Cleaned and filtered a Kaggle dataset of 20,000 tweets by performing lemmatization using Python and Pandas to create a clean, structured dataset for analysis.
- Implemented and trained Long Short-Term Memory (LSTM) models with TensorFlow to predict future tweet emotions by leveraging users' tweet history.
- Improved model performance by applying SMOTE and filtering dataset users with extreme tweet counts, achieving an accuracy, precision, recall, and F1 score of 0.82.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, C, HTML/CSS, SQL

Frameworks & Libraries: Flask, SQLAlchemy, Node.js, Docker, React, Bootstrap

Technologies: AWS (Lambda, RDS), PostgreSQL, SQLite, MySQL, Linux, Hadoop

Development: Agile Methodologies, Scrum, Jira, Figma, Miro, UML

Security Clearance: Secret Level (Department of Defense) July 2024 - Present
